

Contents

1. Introduction	7
1.1. Pairwise Comparisons method	7
1.2. The aim of the work	8
1.3. Content of the work	8
2. Pairwise Comparisons method	9
2.1. PC matrix	9
2.2. Weight vector	9
2.3. Inconsistency	10
3. Inconsistency indexes	11
3.1. Inconsistency indexes for complete matrices	11
3.1.1. Saaty index (CI)	11
3.1.2. Geometric consistency index (GCI)	11
3.1.3. Koczkodaj index (K)	12
3.1.4. Kazibudzki indexes ($MLTI, MLTI^*, CMLTI^*$)	12
3.1.5. Index of determinants (PL)	13
3.1.6. Kułakowski and Szybowski indexes ($I_1, I_2, I_\alpha, I_{\alpha,\beta}$)	13
3.1.7. Harmonic consistency index (HCI)	14
3.1.8. Golden and Wang index (GW)	14
3.1.9. Salo and Hamalainen index (CM)	15
3.1.10. Cavallo and D'Apuzzo index (I_{CD})	15
3.1.11. Relative error (RE)	15
3.2. Inconsistency indexes for incomplete matrices	16
4. Studies of the inconsistency indexes for incomplete matrices	19
4.1. Algorithm	19
4.1.1. Procedure steps:	19
4.1.2. Details of the algorithm	20
4.2. Implementation	20

4.2.1. Development environment	20
4.2.2. Implementation of the tests of the inconsistency indexes	20
4.2.3. Documentation	27
5. Results and discussion	29
5.1. Results	29
5.1.1. Tests taking into account different matrix sizes	29
5.1.2. Tests taking into account different degrees of incompleteness	29
5.1.3. Tests taking into account different levels of inconsistency	30
5.2. Discussion.....	30
5.2.1. Tests taking into account different matrix sizes	30
5.2.2. Tests taking into account different degrees of incompleteness	31
5.2.3. Tests taking into account different levels of inconsistency	32
5.2.4. General discussion	32
6. Summary.....	35
7. Appendix.....	37
